THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN **THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE** OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. **THIS STATUTORY PERIOD CANNOT BE EXTENDED.** SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claim 1. A digital receiver arrangement comprising a tuner/demodulator circuit and analogue-to-digital converting means, and further including means for storing an impulse wavelet representation characteristic of an impulse noise event, wherein the impulse wavelet representation comprises a sequence of data perturbation values, means for determining if an interference impulse is present in a received signal, and means for combining the stored representation of the impulse wavelet with the detected received impulse only if an interference impulse is determined to be present in the received signal so as to counteract the effect thereof within the received signal, wherein the means for determining if an impulse arises comprises comparison means for comparing the stored impulse wavelet representation with a wavelet arising in the received signal.

Claim 12. A method of receiving a digital signal including the steps of demodulating a received signal, and conducting an analogue-to-digital conversion of the demodulated signal, and including the further steps of storing an impulse wavelet representation characteristic of an impulse noise event, wherein the impulse wavelet

representation comprises a sequence of data perturbation values, determining if an impulse interference event is found within an incoming signal, and combining the said stored impulse wavelet representation with the received impulse interference event only if an interference impulse is determined to be present in the incoming signal so as to counteract the effect thereof, wherein said step of determining includes comparing the stored impulse wavelet representation with a wavelet arising in the incoming signal.

Allowable Subject Matter

2. **Claims 1, 3-12 and 14-25** are allowed.
3. The following is an examiner's statement of reasons for allowance:

Consider **claim 1**, the best prior art of record found during the examination of the present application, **Nokes (EP 1043874)** in view of **Salembier et al. (US Patent 4879729)** fails to specifically disclose, teach, or suggest storing an impulse wavelet representation characteristic of an impulse noise event, wherein the impulse wavelet representation comprises a sequence of data perturbation values; comparison means for comparing the stored impulse wavelet representation with a wavelet arising in the received signal; and means for combining the stored representation of the impulse wavelet with the detected received impulse.

Nokes discloses a digital receiver arrangement (paragraph 0008, figure 4) comprising a tuner/demodulator circuit (tuner 34) and analogue-to-digital converting means (ADC 36), means (paragraph 0015) for determining if an interference impulse is present in a received signal, and clipping the interference impulse only if an interference

impulse is determined to be present in the received signal so as to counteract the effect thereof within the received signal.

Salembier et al. disclose a circuit/method for canceling impulsive noise wavelet (clicks is characterized by the appearance of very short pulses having a large energy/amplitude) in a digital system (figures 3, 7a, column 1 lines 21-53, column 6 line 46-column 7 line 13) comprising means (click detector) for determining if an impulse interference event is found within an incoming signal, means (memory 341a comprising values to be subtracted) for storing an impulse wavelet representation characteristic of an impulsive noise event, means for combining (sum 343a) the stored representation of the impulse wavelet with the detected received impulse (output of filter 200) only if an interference impulse is determined to be present in the received signal so as to counteract the effect thereof within the received signal (comparator 320 compares the output of click detector with a threshold before carrying out subtraction process in sum 343a), wherein the means (figure 3, click detector 310, comparator 320) for determining if an impulse arises comprises comparison means (comparator 320) for comparing the value of the reference threshold R_0 with a wavelet arising in the received signal (the output signal of the click detection circuit 310).

These teachings clearly differ from the claimed invention; therefore, claims 1, 3-12 and 14-25 of the present application are considered novel and non-obvious over the prior art and, consequently, are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
